YOGA SAKTHI AGNESH

Data Analyst | Data Engineer | BI & Visualization Specialist

Bengaluru, India | +91 9500512489 | yogasakthi.agnesh@gmail.com | linkedin.com/in/yoga-sakthi-agnesh-n-97b13068

PROFESSIONAL SUMMARY

Analytics and BI professional with 4+ years of experience turning raw data into dashboards, reports, and decision ready insights for senior stakeholders across finance, sales, and consulting. Skilled across the full data lifecycle, building ETL/ELT pipelines on Azure Databricks and Delta Lake, then translating that data into executive ready Tableau and Power BI dashboards, self serve analytics, and AI powered data apps. Currently supports C suite and portfolio leaders as a Specialist, Analytics and Insights at Deloitte, combining data engineering, analytics, and applied AI to deliver reporting solutions that scale. Comfortable owning a project end to end, from requirements and data modelling through to dashboard delivery and stakeholder training.

CERTIFICATIONS

Databricks Certified Data Engineer Associate, Databricks, April 2026

TECHNICAL SKILLS

BI & Visualisation: Tableau (LODs, Calculated Fields, Server/Cloud Publishing), Power BI (DAX, Power Query, Drillthrough, Row Level Security), Advanced Excel (VBA Macros, Pivot Tables, Power Query)

Analytics & Querying: SQL (CTEs, Window Functions, Aggregations, Subqueries; ANSI, PostgreSQL, Databricks SQL), Python (pandas, NumPy, matplotlib, seaborn, plotly), PySpark, Pytest

Data Engineering & Lakehouse: Azure Databricks, Delta Lake, Delta Live Tables, Auto Loader, Medallion Architecture (Bronze, Silver, Gold), Unity Catalog, Structured Streaming, Databricks Asset Bundles

AI & Automation: Custom data apps and AI powered artifacts, chatbot and Genie Space development, Power Automate workflow automation

Data Sources & Platforms: SAP HANA, Salesforce CRM, Snowflake, Apache Kafka, Azure Blob Storage, CSV/JSON, ServiceNow, Genesys Cloud

Collaboration & Delivery: Azure DevOps, Git, Jira, SOP Development, Stakeholder Training, Knowledge Transfer

PROFESSIONAL EXPERIENCE

Specialist, Analytics and Insights · Deloitte USI Consulting · Bengaluru **Jun 2026 to Present**

- Partner directly with C suite executives and Industry and Offering Portfolio leaders to design custom reporting and analytics solutions for high stakes strategic decisions.
- Build and maintain Databricks jobs and pipelines that refresh Medallion Architecture tables from raw data, powering dashboards, chatbots, data apps, and automation workflows.
- Deliver analytics solutions for strategic initiatives within the Growth Office and Sales Excellence teams, turning business priorities into usable data products.
- Use AI to build custom data apps and AI powered artifacts for internal stakeholders, extending self serve analytics beyond traditional dashboards.

Consultant, Reporting & Analytics · Deloitte USI Consulting · Bengaluru **Jun 2025 to May 2026**

- Architected ETL/ELT pipelines on Azure Databricks with DevOps teams, ingesting data from SAP HANA, Salesforce, and Kafka into Bronze, Silver, and Gold layers using Medallion Architecture, validated with Pytest before deployment.
- Built and published Tableau and Power BI dashboards with LOD expressions, DAX measures, and row level security, cutting leadership dependency on ad hoc analyst requests by 5+ hours per week.
- Used Delta Live Tables, ACID transactions, Time Travel, and Delta Sharing in production to keep pipelines reliable and datasets recoverable.
- Delivered automated reporting to CEOs, COOs, and Finance Business Partners using SQL, Databricks, Tableau, and Power BI, reducing manual reporting cycles by 60%.
- Acted as SME for analytics architecture, ran training sessions for non technical stakeholders, and maintained SOPs and knowledge transfer documentation.

Analyst, Reporting & Analytics · Deloitte USI Consulting · Bengaluru **Aug 2024 to Jun 2025**

- Built ETL/ELT pipelines on Azure Databricks ingesting data from SAP HANA, Salesforce, and Kafka into Medallion Architecture layers, validated with Pytest unit and integration tests.

- Developed Tableau and Power BI dashboards using SQL, DAX, and Power Query, cutting ad hoc reporting requests by 70% across the practice.
- Wrote SQL, PySpark, and VBA macros to automate recurring sales and pipeline reports, reducing manual reporting effort by 70%.
- Ran knowledge sharing workshops for non technical stakeholders on analytics tools and automation, and supported onboarding of new analysts.

Analyst, Finance Service Desk · Deloitte USI Enabling Areas · Bengaluru **Nov 2022 to Aug 2024**

- Processed FP&A reporting and reconciled AmEx Corporate Card transactions across Salesforce, SAP, and Ariba, building the Excel and enterprise data foundations that led into analytics roles.

Academic Specialist · Think & Learn Pvt Ltd (BYJU'S) · Bengaluru **Jan 2022 to Oct 2022**

- Delivered data tracked academic programmes for K10 to K12 students, using Excel dashboards to monitor performance and conversion metrics.

Functionality QA Technician · Testronic Labs · Warsaw, Poland **Sep 2019 to Sep 2020**

- Executed functional and regression testing for AAA game titles, tracking defects in Jira and producing structured QA reports.

PROJECTS

End to end work spanning data engineering and analytics, from raw ingestion through to the dashboards leadership uses.

Customer Segment Revenue Analysis, National UK Bank

End to end pipeline and analysis built for a national bank that lacked visibility into which customer segments were driving revenue. Ingested and modelled 3+ years of transactional data in Azure Databricks using SQL and PySpark, applying window functions and cohort logic to segment 100K+ customers by region, age, gender, and product holding, then surfaced the findings in Tableau with interactive LOD calculations. Reduced ad hoc reporting requests by an estimated 5 hours per week and directly informed a regional cross sell campaign.

Sales Pipeline & Revenue Visibility Platform, Deloitte Consulting (Internal)

End to end platform built after consulting leadership lost visibility into pipeline health and revenue recognition and were relying on stale, manually refreshed spreadsheets. Modelled Databricks tables using SQL into a clean, denormalised analytical layer, then built role level Power BI dashboards with row level security, DAX measures for weighted pipeline value and win rate trends, and drillthrough pages by practice and geography. Replaced 3 separate weekly Excel reports with a single self serve platform and cut reporting preparation time by over 60%.

EDUCATION

PGDM / MBA in Management, Business Strategy & Analytics **2019 to 2020**
University of Economics and Human Sciences, Warsaw, Poland

B.Tech, Chemical Engineering **2012 to 2016**
Sri Venkateswara College of Engineering, Chennai, India
